Subject: MedHelper Collaboration on Breast Cancer Research at Clinic Ville-Marie

Dear M. KEYSERLINGK,

I am writing on behalf of MedHelper to express our interest in collaborating with your organization on a research project. We aim to enhance the effectiveness of the project through the utilisation of MedHelper, a patient engagement technology solution, accessible via the Medesync EMR system.

MedHelper's integration into Medesync EMR for the purpose of this project promises to significantly elevate the quality of data collection and analysis, thereby improving treatment outcomes for breast cancer patients in the future.

We believe that by joining forces, we can harness the full potential of MedHelper to provide invaluable insights into patient experiences and responses to treatment modalities.

We are confident that this initiative will offer direct benefits to patients by improving their overall care journey. We are eager to combine our expertise for the betterment of patient care and research in breast cancer.

Warm regards,

A handwritten signature in black ink, appearing to read 'Frederic Simard', with a stylized flourish at the end.
